DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Masahiko (Japanese Publication Number 2002-204504).

Masahiko teaches a hybrid vehicle including: an engine having a crankshaft; a transmission that has an input shaft joined coaxially to the crankshaft and an output shaft disposed in parallel to the input shaft, and is capable of changing the gear ratio between the input shaft and the output shaft; and a generator/motor that is disposed at a position sandwiched between the engine and the transmission and a position off an axis of the input shaft, and transmits its driving force to any position of a power transmission pathway between the output shaft and a differential, gear; and a starter motor that can crank the crankshaft and is disposed at a position sandwiched between the engine and the transmission; the vehicle being capable of traveling by means of either one or both of the driving force of the engine and the driving force of the generator/motor and at least parts of the generator/motor and the starter motor overlapping each other when viewed in a direction perpendicular to the axis. The generator/motor is disposed coaxially with the output shaft. The starter motor is disposed coaxially with the crankshaft. See the abstract.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hahne shows an infinitely variable transmission for automotive vehicle driveline.

Lings shows components in or for self-powered vehicles.
